Branch Report

Central branch had only one meeting this year which was held in Centlec on the 19 April 2012. Attendance was better than other previous meetings. We had officials from LEC Municipality from water department. We also had officials from the police department to give us feedback about copper theft.

We also had brilliant topics lined up which were as follows:

- Revenue Protection through smart metering – Marius Loggenberg- SPASA
- Protective Kiosk – Billy Murray- Greenbro
- SARPA executive – Rens Bindeman

Though this meeting was better attended compared with the previous one I must say that the branch struggles to get more people. What I have noticed is that the response is better if the meeting is held at Centlec premises. Once the meeting is held in another venue other than Centlec attendance becomes poor.

The next branch meeting is scheduled for 15 November 2012.
