10:00	Refreshments		
Efficiency			
10:15	NRS 055 : Code of practice for Revenue Protection	Dirk Byker, Tshwane Municipality & SARPA President Elect	The code of practice was prepared on behalf of the Electricity Suppliers Liaison Committee (ESLC) to establish and promote uniform best practices for RP by electricity utilities and their contractors.
10:45	Customer Stratification as a means for Targeted Audits	Maboe Maphaka & Wim Terblanche, Eskom / EON Consulting	The Customer Stratification methods looks at the proactive identification of potential energy loss customers. The adopted approach involves segmenting the customer base by making use of customer characteristics that drive consumption.
11:15	Marrying Theory, Technology and Proactive Management to Improve Revenue (Turning Revenue Management Initiative into Rands and Cents)	Keith Galatis , Utility Design Services	There are many approaches to combating revenue losses. Each approach requires technology, management focus and scarce financial resources. How can a utility ensure that a particular approach will

			have the desire improvements? A strategic approach to revenue improvement, what to focus on, how to plan and what to measure.
11:45	The impact of inaccurate process variables on the Energy Balancing process	Maboe Maphaka, Eskom	There are a number of variables affecting the accuracy of reported Energy Losses, which positively or negatively affect the interventions that Revenue Protection departments can use to manage losses to acceptable levels. This paper will address the salient points of these factors and how utilities can use the lessons learnt from this project to better manage their Energy Losses and hence improve their financial performance.
12:15	Using International Benchmarking & Best Practices as a means of enhancing revenue loss management	Nigel Waters , EDI Holdings	The International utility benchmarking programmes and International revenue protection challenges. The International norms, standards and best practices. The application in the South African context and the way forward.
12:45	Efficiency in our Revenue Protection Initiative	Neal Douglass , Power Measurement & Distribution	Various Measurement protection initiatives are utilised by municipalities but often the problem is to quantify the results and further actions to be taken. i.e. where does the municipalities spend their limited resources (staff, time and money) for the best return on investment – Most bang for their buck.
13:15	Members Forum & Closure		
13:45	Light Lunch
