

## **Riccardo Pucci – STS Association**

**Riccardo Pucci is the Technical Marketing Specialist for the STS Association and is also serving as the TID Rollover Project Co-ordinator, spearheading The TID Rollover Communication drive.**

**Riccardo will unpack the Evolution of STS to Smart Metering, and the strides being made to meet emerging international demands for additional functionality of prepayment systems. He will highlight the alignment of STS Edition 2 with the Association's major focus on innovation, introducing brand new features compatible with modern metering technologies, whilst still maintaining backward compatibility with current systems in use. He will also focus on DLMS COSEM as a virtual token carrier type, which allows for two-way communication offering powerful smart meter functionality with an extensive range of valuable benefits for utilities and electricity service providers worldwide.**
